

Brothers and Sisters,

Subject: FW: Speeding Morrisville Yard

Be advised that NJT is using radar and downloads to monitor speed compliance at Morrisville. Penalties for over speed are severe. Please check all Rule Compliance at all locations.

The standard practice at Morrisville by some Engineers is to slow down to 10mph at the road crossing (est. 1 car length) instead of at the END OF ATC sign.

The maximum speed at the yellow boxes is 10 mph. The 10 mph restriction starts a few feet East of the yellow boxes. This restriction is for the entire movement.

The ARVIS SYSTEM reads car numbers and Train Speed. It is set for 10 mph. The system is located just inside the (10mph) limits and must be complied with.

Fraternally,
R. Darcy
